Sixth Sunday of the Year

THOUGHT FOR THE WEEK

Thanks to the advances in modern medicine, the incidence of leprosy in our world today is minimal, but 2000 years ago it was a different matter. Lepers were many and they had to be segregated because the disease was so virulent.

The leper in today's Gospel reading showed great faith in the ability of Jesus to cure him of his leprosy. When he asked Jesus to cure him, Jesus performed one of his dramatic miracles.

Today's major disease is one of faithlessness in God and in his care for us. The disease is based largely upon apathy and greed—and it is very infectious!

Many people, seem to relegate God to an 'as-and-when-required' relationship rather than making the effort actively to return the love he shows each of us every day of our lives. Surely, we should practising our faith, in all its aspects, to show our gratitude for God's love through regular and frequent worship and by practising good works.

And then there is greed...and so much, and it is taken very much for granted. Some in our affluent society elevate greed to the status of a god. They seem unable to manage without something new, something better, something more and they want it NOW! How much more peace of mind could be enjoyed by curbing their selfish desires and sharing what they have with those who are less fortunate than themselves. In doing this, they would truly demonstrate their love of God and their neighbour.

A prayerful re-reading of today's Gospel reading may help to develop a more vibrant faith and may lead towards a better sharing of the world's resources—and our own, of course.

God Bless.
